

Reduce Illegal Dumping

Free Dumping Day

Visit Ljwinc.com

As part of the ongoing effort to reduce illegal and clean up West Baltimore L&J is offering one day of free dumping at its processing facility located at 222 N. Calverton Road will allow free dumping on any Saturday of the city choice from 7am to 1pm.

Our targeted market would be small contractors / hauler and local waste generators Who may not be familiar with private own local Baltimore facility.

The purpose of the one day of free dumping at the L&J facility is two fold. First it will result in the removal of debris from recent illegal dumping and second it will make the small generators aware of the L&J facility which accepts and recycles construction demolition debris. While L&J is opening up its doors to the small waste generators for free on this one day after that the company will offer a discounted rate and close proximity.

Some city streets and neighborhoods are being used as dumping grounds by contractors and home renovators.

We think that the one day of free dumping is a way that the city and privately you own company can promote and work together and help control illegal dumping.
